## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. All claims require a non-trivial limitation directed to technology. The method claims omit this feature.

### ***Claim Rejections - 35 USC § 112***

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation --an action that relates to trading-- is subjective and therefore vague and indefinite. The limitation -- without requiring the consent of the trader -- , is confusing as the previous limitation -- the password -- reads on a consent. As to the limitation -- reporting trades -- and -- setting privileges, it is not clear who is setting the trading privileges and to whom the privileges apply? As to the limitation -- setting a buying limit --, to whom does the limit apply? As to the limitation -- setting a broker commission --, to whom does the broker commission apply? As to the limitation -- combining trades --, it is not clear what and how the trades are combined.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 1-60 are rejected under 35 U.S.C. 102(e) as being anticipated by Buist.

Figure 3 and the accompanying specification teach an apparatus, computer readable medium, and computer-implemented method for controlling a trading account. The reference inherently teaches receiving information including a password, identifying the trading account, obtaining access to the trading account, viewing a trade or executing a trade, Figure 9 teaches reporting trades. Setting privileges is shown in figure 11, box 1175. Setting a buying limit is shown in figure 43A. Setting a broker commission is inherent in the prior art method of Figure 22, box 2275 as brokers receive commission on trades. Combining trades is shown in figure 60. Viewing messages is shown in figure 44. Viewing the performance is shown in figure 60.
